

CERTIFIED according to ISO 22196 (mod.)

CERTIFICATE

on the antimicrobial properties of

DYPHOX® Universal-Coating

of the company

TriOptoTec GmbH

Am Biopark 13

93053 Regensburg, Germany

has been successfully tested versus

Acinetobacter baumannii DSM 30008 / ATCC 15308

as **antimicrobial**

≥ **99.99% germ reduction**

according to ISO 22196 (modified)

In contrast to the standard method with the test bacteria on a covered and therefore permanently moist surface, the test was carried out dry at room temperature and under the influence of visible light.

The antibacterial effect is clearly related to the photocatalytic effect of the coating tested.

For details, see Test Report No. 3607.2 Rev1 / 200417-10295-22196-02

The bearer of this certificate is entitled to affix the following seal to parts or surfaces made from the tested material

Nuremberg, Germany, July 21st 2020
